Chapter 1

Introduction

1.1 Read me

If you need help [Oet+25], [Lee20], there are also a lot of Youtube videos available, and if you're stuck, consult the savior ChatGPT or gemini.

1.2 Set up

main.tex file controls the overall structure of the document.

All the packages are in the folder 0Config, file: pagesetup. A lot of packages have been added but if you need to use other packages add it to pagesetup.tex. Check out [this page](#) for a list of packages and when to use them. You can also change the colour and margin from their. for changing the font main.tex

1.3 Add new chapters

For adding new chapters either do `\chapter{chapter name}` in this file itself or in the filetree find the folder Chapters and add a new file for a new chapter and write `\include{2Chapters/newfile}` in main.tex.

(Suggestion: make a new file for each chapter easier for editing and keeping track)

The biblo.bib file is where the bibliographic entry should be done. Use `\cite{}` for citing in text, until and unless you cite something, bibliography page will not show up.

1.4 LOT & LOF

The list of tables and figures will automatically get updated as you will add tables and figures.
